PROFESSIONAL PROFILE

IT Technician and Full Stack Developer with experience in technical support, IT infrastructure, and web application development. I specialize in building scalable solutions using technologies such as Node.js, PostgreSQL, React, and Tailwind CSS, combining frontend, backend, and database development. I also have experience in hardware maintenance, operating systems, process automation, and the integration of AI-powered solutions, always focusing on problem-solving and continuous improvement.

WORK EXPERIENCE

Full Stack Developer & IT Support Specialist, BelkCar Informática | FEB 2026 - Present

Provide specialized technical support, including computer maintenance and repair, operating system installation and configuration, custom PC assembly, and technical assistance for clients. Additionally, I contribute to the development of Full Stack web applications using Node.js, PostgreSQL, Prisma, Python, JavaScript, TypeScript, HTML, CSS, and Tailwind CSS, implementing solutions focused on process automation and AI integration.

IT Support, Hospital José María Cullen | APR 2025 - JUL 2025

Performed comprehensive technical support tasks, including the implementation of structured cabling across various hospital departments. I carried out preventive equipment maintenance, optimization of Windows and Linux MX operating systems, and the installation and configuration of IP video surveillance systems (HIKVISION).

EDUCATION

Professional and Personal IT Technician, E.E.T.P. N° 480 Manuel Belgrano, 2020 - 2025.

KEY SKILLS

- Frontend: React, Tailwind CSS, HTML5, CSS3.
- Backend & Languages: Node.js, Python, JavaScript, PostgreSQL, Prisma.
- Infrastructure: Hardware maintenance, Networking, and Operating Systems (Windows/Linux).
- Security: CCTV installation and configuration (HIKVISION).
- Soft Skills: Teamwork, problem-solving, and continuous improvement.

ADDITIONAL INFORMATION

Participant in the TecnoMate programming competition (high school level), demonstrating problem-solving skills under pressure. Interested in the regional IT sector, having completed technical visits and attended talks at leading companies such as Globant, Crombie, and Folder IT to learn about their work methodologies and organizational culture.
